TITLES

£450 Question, The, by J.H.E. Cohn, 220–226

2500-Year-Old Pythagorean Theorem, The, by Darko Veljan, 259–272

Abundancy Ratio, a Measure of Perfection, The, by Paul A. Weiner, 307–310

Bernoulli Trials and Family Planning, by Eugene F. Krause, 212–216

Beyond Monge's Theorem: A Generalization of the Pythagorean Theorem, by Eisso J. Atzema, 293–296

Bifurcation Problem in Differential Equations, A, by Duff Campbell and Samuel R. Kaplan, 194–203

Bijections for the Schröder Numbers, by Louis W. Shapiro and Robert A. Sulanke, 369–376

Boxes for Isoperimetric Triangles, by John E. Wetzel, 315–319

Bubble Theorem, A, by Oscar Bolina and J. Rodrigo Parreira, 396–397

Cantor, Schröder, and Bernstein in Orbit, by Berthold Schweizer, 311–312

Chaos and Love Affairs, by P.-M. Binder, 235–236

Chaotic Results for a Triangular Map of the Square, by Ben Shanfelder and Annalisa Crannell, 13–20

Combinatorial Approach to Sums of Integer Powers, A, by George Mackiw, 44–46

Convergence Theorem for the Riemann Integral, A, by Russell A. Gordon, 141–147

Counting on Continued Fractions, by Arthur T. Benjamin, Francis Edward Su, and Jennifer J. Quinn, 98–104

Dinner, Dancing, and Tennis, Anyone?, by James N. Brawner, 29–36

Edge-Length of Tetrahedra, by Hans Samelson, 236–237

Eisenstein's Lemma and Quadratic Reciprocity for Jacobi Symbols, by Brett

A. Tangedal, 130–134

Euler's Formula for $\zeta(2k)$, Proved by Induction on k, by Ji Chungang and Chen Yonggao, 154–155

False Conjecture Is True ne-Way, by Zachary M. Franco, 49–52

From 30 to 60 Is Not Twice as Hard, by Michael Dalezman, 151–153

Generalizing Van Aubel Using Duality, by Michael de Villiers, 303–307

Gyro-Structure of the Complex Unit Disk, The, by Michael K. Kinyon and Abraham A. Ungar, 273–284

Heron Triangles: An Incenter Perspective, by K.R.S. Sastry, 388–392

How Many Magic Squares Are There?, by Carl Libis, J.D. Phillips, Mike Spall, 57–58

How to Determine Your Gas Mileage, by Alexander J. Izzo, 226–231

Illegal Aliens and Waiting Times, by Eugene F. Krause, 381–387

Invisible Points in a House of Mirrors, by G.W. Tokarsky and F.G. Boese, 364–369

Lengthening Shadow: The Story of Related Rates, The, by Bill Austin, Don Barry, and David Berman, 3–12

Math Bite: Enumerating Certain Sparse Matrices, by David Callan, 56

Math Bite: Once in a While, Differentiation Is Multiplicative, by J. Marshall Ash, 302

Math Bite: The Dagwood Random Nap, by W.D. Kaigh and Wilke D. English, 43

Matrices, Continued Fractions, and Some Early History of Iteration Theory, by Michael Sormani, 147–150

Matrix Proof of Newton's Identities, A, by Dan Kalman, 313–315

Minimum Spanning Trees and Determinants, On, by Perrin Wright, 21–28

Monty Hall Uses a Mixed Strategy, by Herb Bailey, 135–141

Odd Spiral Tilings, by Daniel L. Stock and Brian A. Wichmann, 339–346

Perfect Cuboids and Perfect Square Triangles, by Florian Luca, 400–401

Periodic Property in $\mathbb{Z}_m$, A, by Scott J. Beslin and Brian K. Heck, 398–399

PIPCIRs—Polynomials Whose Inflection Points Coincide with Their Interior Roots, by Rachel Belinsky and Peter Andrews, 285–292

Poisson Variation of Montmort's Matching Problem, The, by Don Rawlings, 232–234

Possibility of Impossible Pyramids, The, by Tom Sibley, 185–193

Postmodern View of Fractions and the Reciprocals of Fermat Primes, A, by Rafe Jones and Jan Pearce, 83–97

Principle of Countability, A, by Robert Kantrowitz, 40–42

Proof Without Words: Pythagorean Runs, by Michael Boardman, 59

Proof Without Words: Self-Complementary Graphs, by Stephan C. Carlson, 12

Proof Without Words: Slicing Kites into Circular Sectors, by Marc Chamberland, 363

Proof Without Words: Sums of Sums of Squares, by C.G. Wastun, 238

Proof Without Words: The Arithmetic–Geometric Mean Inequality for Three Positive Numbers, by Claudi Alsina, 97

Proof Without Words: The Sine of a Sum, by Volker Priebe and Edgar A. Ramos, 392

Quadrilaterals with Integer Sides, by Charles Jepsen, Jennifer Heppner, and Daniel Willms, 296–301

Rectangles in Rectangles, by John E. Wetzel, 204–211

Rounding Errors to Knock Your Stocks Off, by Yves Nievergelt, 47–48

Sailing Around Binary Trees and Kruse-meyer's Bijection, Yujin Shen and Jiang T. Shult, 216–220

Scooping the Loop Snooper, by Geoffrey K. Pullum, 319–320

Shortest Shoelaces, by Daniel C. Isaksen, 60–61

Solitaire Army Reinspected, The, by Béla Csákány and Rozália Juhász, 354–362

Spanning Trees: Let Me Count the Ways, by Douglas R. Shier, 376–381

Square Waves from a Black Box, by Temple H. Fay and Stephan V. Joubert, 393–396

Superexponentiation and Fixed Points of Exponential and Logarithmic Functions, by Stephen R. Wassell, 111–119

Thales' Shadow, by Lothar Redlin, Ngo Viet, and Saleem Watson, 347–353

Triangles with Integer Sides, Revisited, by Michael D. Hirschhorn, 53–56

Trochoid as a Tack in a Bungee Cord, The,

by Andrew J. Simoson, 171–184

Variations on a Theme: A_4 Definitely Has No Subgroup of Order Six!, by Michael Brennan and Des MacHale, 36–40

Venn Said It Couldn't Be Done, by Peter Hamburger and Raymond E. Pippert, 105–110

When is the Product of Two Oblong Numbers Another Oblong?, by Trygve Breiteig, 120–129

PROBLEMS

The letters P, Q, *and* S *refer to Proposals, Quickies, and Solutions, respectively; page numbers appear in parentheses. For example, P1602(240) refers to Proposal 1602, which appears on page 240.*

February: P1589–1593; Q897–898; S1564–1568

April: P1594–1598; Q899–900; S1569–1573

June: P1577, 1599–1602; Q901–902; S1574–1578

October: P1603–1607; Q903–904; S1579–1583

December: P1608–1612; Q905–906; S1584–1588

Andreoli, Michael H., S1565(64)
